PROFILE

- Can solve basic machine learning algorithms.
 - Extensive knowledge in python with libraries such as **Numpy**, **Pandas**, **Scikit-learn**, **Matplotlib**, and **Seaborn**.
 - Worked on tools like - **Pycharm**, **Visual Studio**, and **Jupyter Notebook**.
 - I have an exciting set of skills in web development, programming, and data science. I love creating visually appealing websites, coding in different languages, and finding meaningful insights from data. With my passion for learning and collaborative nature, I thrive in the dynamic world of technology, always pushing the boundaries and delivering exceptional results
-

EDUCATION

Sep 2019 — April 2022

Diploma in Computer Engineering, Prime College of Diploma

Navsari

- Learned basics of programming with C language.
- Learned **Java**, **C++** with **object-oriented programming** concepts.
- Learned and implemented web development using HTML, CSS, JavaScript along with PHP and MySQL.

Aug — 2022

Bachelor's in Computer Engineering, SSAIET

Navsari

- Learned Data Science with required skills in python.
 - Built many **end-to-end web development and data science projects** and deployed across different **cloud platforms**.
-

SKILLS

HTML & CSS

Mongo DB

Node JS

Express

React

JavaScript

Next Js

Python

Tailwind CSS

Data Analysis

Bootstrap

PROJECTS

Nov 2021 — April 2022

Shiftless – A Cafeteria Management System using PHP.

- Learned core software engineering fundamentals while building the project.
- Learned how to use HTML, CSS, and JavaScript for building the frontend of websites.
- Used PHP along with MySQL for the backend.
